How to reset an armitron watch wr165

Jupiterimages/Brand X Pictures/Getty Images The Armitron WR165 is a digital watch that includes a 24-hour alarm, hourly chime, stopwatch feature, countdown timer and is water resistant up to 165 feet. With a rubber wristband and rugged style, the watch is meant for outdoor enthusiasts and athletes. The WR165 can be found online, in some sporting supply stores and in certain department or general home stores. Setting the Armitron WR165 only takes a few steps to perform properly. Push the top button on the left-hand side of the watch until the seconds flash on the display. Press the top button on the right-hand side to zero the seconds. Push the bottom button on the left-hand side of the watch until the hours flash and then the top button on the watch display. Note that "PM" will appear on the watch display for PM times, but there is no "AM" indicator on the display. Press the bottom button on the left-hand side of the watch until the minutes flash on the display. Press the top button on the display. Repeat to set the month, date and weekday on the watch. Press the top button on the left-hand side of the watch to return to time mode. Press the bottom button on the left-hand side of the watch to enter the stopwatch mode. Press the top button on the left-hand side of the watch to start the timer. Press one more time to stop timing. Press the top button on the left-hand side of the watch to enter the stopwatch mode. to reset the stopwatch to zero and the bottom button on the left-hand side of the watch twice to set the alarm. Press the top button on the left-hand side of the watch until the hours flash on the display. Press the bottom button on the left-hand side of the watch until the alarm number flashes. Press the top button on the right-hand side of the watch again until the hours flash. Push the top button on the right-hand side of the watch to choose the alarm hour, followed by the bottom button on the left-hand side of the watch to change to minutes. Press the top button on the left-hand side of the watch to set the alarm time and the bottom button on the left-hand side of the watch to return to time mode. Since every instruction I could find on the Internet was wrong, I put up this page which is right. (At least it works for me.) You're welcome. Hold down MODE until hours flash Press ADJUST to set hours Press MODE seconds flash Press ADJUST to zero seconds Press ST/STOP minutes flash, ADJUST to set minutes Press ST/STOP date flashes, ADJUST to set date Press ST/STOP month flashes, ADJUST to set month Press ST/STOP day of week icon flashes, ADJUST to set day of week Press MODE to end If you press ADJUST and then add ST/STOP you can cycle through alarm on/off, chime on/off. If you press ST/STOP by itself (in time mode), the date will show. 4 March 2011 To set the top left button "A", then press the top right button "C" to reset the seconds. Press the bottom left button "B," then press "C" to set the correct hour. Press "B" and "C" again to set minutes and date. The Armitron WR165 watch features four main buttons: a top left button labeled "B," a bottom left button labeled "B," a top right button labeled "C" and a bottom right button labeled "D." Press and hold "B," and wait for the time to flash. Press "C" to set the correct time. Repeat again, and press "B" to move on and set the date. Information flashes in a specific order, so to change only one item, continuously press "B" to move on to the next piece of information. The order is seconds, hours, minutes, day, month and day of the week. To finish and go back to the main display, press "B" one last time. Need to know how something works and you've lost your manual? Get some of the manuals in pdf formats, enter the style number found on the back cover of your watch. Please insert the style number. On the back of your Armitron watch, please look for your 6-digit style number. The style number should begin with either two numbers. If you have trouble locating your style #, please contact customer support for further assisstance. Sorry, there are no PDF file for the "SKU #". Please contact the customer service: Please contact the customer service: 1-866-631-0342 or (718)784-0700 support@armitron.com 1 Hold the Reset button until the watch beeps. Locate the Reset button on the top left side of your Armitron watch. Hold the button for about 3 seconds or until it beeps. You should notice numbers on your screen start flashing.[1] Depending on your watch model, the button may say Set instead of Reset. 2 Press the Mode button to change between the hours, minutes, day, and date. The Mode button is usually found on the bottom right side of your Armitron watch. When you press the mode button, the section that's flashing on your screen will change. This way, you can easily switch between changing the hour, minutes, day, and date. Keep pressing Mode until you reach the value you need to change. [2] Whatever is flashing on your watch is the value you're changing. 3 Increase the number by pressing the St/Stp button. Locate the St/Stp button on the top right side of the Armitron watch. Whenever you want to change a value, press the button until you reach the right number. If you need to reach an earlier time or day, keep pressing the button until it cycles over.[3] Check if you have the time set as AM or PM on your watch so all of the information is accurate. On some models, like the WR330, the St/Stp button may be labeled Adj. 4 Press the Reset button in the top left when you're finished. After you've set all of the information correctly, press the Reset button to lock in all of the information. Check your watch over the course of the next day to make sure the time is a fourth button on your watch, it is not used to set the time or date. 1 Pull out the crown on the side of the Armitron watch until it clicks once to set the date. The crown is the dial on either the left or right side of the watch face. Pinch the crown will only pull out only pull out out slowly. [5] If your watch doesn't display the date, then the crown will only pull out once to set the time. You may skip this step. 2 Turn the crown until the correct date appears in the window. Rotate the crown clockwise depending on your watch model. Keep turning it until the correct date is in the window on your watch face. If you only needed to change the date, push the crown all the way in to set it.[6] Avoid adjusting the date on your watch between 11 PM and 5 AM since that's when it advances to the next day. 3 Pull the crown until it clicks twice to adjust the day of the week and time. If you have a watch that displays the day/date, pull the crown until it clicks twice. If your watch doesn't have that display, simply pull the crown until it doesn't go any further. [7] 4 Rotate the crown clockwise or counterclockwise depending on the watch model you're using. Spin the hands for 2 full rotations around the watch face to move forward by 24 hours. Keep turning the crown until you reach the correct day of the week and date set, turn the crown the watch will advance it. 5 Adjust the time by rotating the crown. Once you have the day of the week and date set, turn the crown the crown the crown and 5 AM since this is when the watch will advance it. 5 Adjust the time by rotating the crown. Once you have the day of the week and date set, turn the crown the crown the crown are the control of the week and date set. until the hands point at the correct time. Get as close as you can to the right time so your watch is accurate within a minute or two.[9] The hands won't start moving on their own until you press the crown back in. If your clock has a military time dial, make sure it's correct compared to the current time. 6 Push the crown all the way in to set the time. Once you've made all of your adjustments, press the crown all the way in so it starts again. Check the watch periodically throughout the day to make sure it maintains the correct time. [10] If the watch keeps falling behind, you may need to replace the battery. 7 Finished. Add New Question Question Question I have an Armitron 45/7041, a sports watch with red around it. The alarm goes off every 3-ish minutes. How do I stop it? Press mode until a1 a2 or a3 pops up then where it says CHRONO adj or set and fidget with it and it should work. Question I have an Armitron Sports watch, black resin strap band with a silver plate ontop. The model says 45/7042. How do I change the hour format from 24 to 12? Go to setting the time until you get to the time you want. It will cycle through Military time, then AM, then PM. Question I need to reset the day; it says Thursday, but it's Friday. How can I do that? Press mode until it opens the time change, then press the right-side buttons. First minutes will be flashing; press again for hours, and then again to allow you to change day of the week. Question How do I set an alarm on my Armitron watch? Hold down the A button to show the alarm, and then use the same buttons you'd use to change the time to set it. Question How do I find the manual for my Armitron watch? It should be in the box it came in. If not, visit the Armitron website and locate the manual for your model. Question How can I shut the alarm off and de-activate the alarm symbol on my Armitron watch? Hold the reset and the st/stp button (the 2 top ones) until it beeps twice. Then the alarm symbol automatically goes away when the alarm is off. Question How do I stop my alarm from going off on my Armitron watch? It was accidentally set. Hold down the reset and the st/stp (the top 2) until the watch beeps twice. Once it beeps, the alarm is off. Question How do I turn off the hour chime? Hold down the reset and the st/stp (the top 2) until the watch beeps twice. Once it beeps, the alarm is off. Question How do I shut off the alarm on my Armitron watch? Hold down the reset and the start/stop [the top 2] until the watch beeps twice. Once it beeps, the alarm is off. Question How can I change my watch so that it doesn't display the time in the UK, and how do I access the stopwatch? From the normal time display, press the MODE button. That's all you need to do.
